

# With Simbrah . . .

**WE PROFIT IN THE BEEF BUSINESS!**

Our Simbrah cattle adapt to an environment where cattle need some Brahman influence to thrive. Carcass quality is not sacrificed for that environmental adaptability because our Simbrah steers continue to produce carcasses that the market demands and bring in more profit. The last group of Simbrah steers from our bulls netted \$53.74 (46%) over the average net return in the TAMU Ranch to Rail South Feedlot program and produced carcasses that graded:

10% Prime      50% Choice      40% Select  
80% YG 1 & 2      20% YG 3
